

MELISSA OIL

A distinctive aromatic botanical oil for fragrance and formulation development.

FRESH • HERBAL • LEMON-LIKE AROMATIC PROFILE

Product overview

Melissa oil is commonly associated with lemon balm, *Melissa officinalis*, and is valued for a fresh, lemon-like herbal aroma. The exact botanical identity, plant part, extraction method and composition of the supplied material should be confirmed against its batch specification and Certificate of Analysis.

Aroma character

Typically described as fresh, lemony and herbaceous. The aroma and composition can vary with origin, processing and material quality.

Potential applications

- Fine fragrance and aromatic accords
- Personal-care and cosmetic formulation, subject to assessment
- Home-fragrance concepts
- Ingredient research and development

Formulation considerations

Evaluate the material in the intended product base. Confirm compatibility, stability, sensory performance and safe use levels through qualified formulation and safety review.

Botanical identity to verify

Confirm whether the product is genuine *Melissa officinalis* essential oil, a blend, or another lemon-scented botanical material. Do not infer purity or species from the trade name alone.

FOR FRAGRANCE & FORMULATION PROFESSIONALS

Quality checks and responsible handling for Melissa Oil.

Buyer and quality checklist

Before selecting the material, review technical documentation and test a representative sample in the intended product base. Confirm aroma, appearance, composition, compatibility, stability and packaging suitability under relevant storage conditions.

For buyers and formulators	Batch documents to request
<ul style="list-style-type: none"> • Confirm intended application and grade. • Review a representative sample. • Assess compatibility and stability. • Set use levels only after safety review. 	<ul style="list-style-type: none"> • Batch-specific Certificate of Analysis (COA). • Safety Data Sheet (SDS). • Botanical identity and plant part. • Extraction method and composition profile. • Origin and relevant regulatory declarations.

Handling and safety

Essential oils are concentrated materials. Follow the supplier's SDS and applicable regulations. Do not apply undiluted to skin or ingest. Use only in applications supported by the verified grade and a suitable safety assessment. Avoid contact with eyes and keep securely closed and out of reach of children.
