

GINGER GRASS OIL

A distinctive aromatic botanical oil for fragrance and formulation development.

FRESH • HERBAL • CITRUS-FLORAL AROMATIC CHARACTER

Product overview

Ginger Grass Oil is a trade name used for an aromatic oil associated with certain *Cymbopogon* grasses. The exact botanical species and chemotype can vary by supplier. The generated product image references *Cymbopogon martinii*, but this identification must be checked against the actual product specification and batch Certificate of Analysis before it is used on a commercial label or technical sheet.

Aroma profile

Often described as fresh, green, herbaceous and softly citrus-floral. The exact aroma depends on species, chemotype, harvest and distillation.

Potential applications

- Fine fragrance and perfumery
- Fragrance accords and aromatic blends
- Cosmetic and personal-care formulation, subject to safety review
- Ingredient research and development

Formulation considerations

Evaluate a representative sample in the intended product base. Confirm compatibility, stability, sensory performance and appropriate use levels through qualified formulation and safety assessment.

Botanical identity to verify

Confirm the accepted botanical name, plant part, chemotype, extraction method and origin. Do not infer the identity or composition from the trade name alone.

FOR FRAGRANCE & FORMULATION PROFESSIONALS

Product evaluation, quality checks and responsible handling.

Quality and evaluation checklist

Before selecting the material, review technical documentation and test a representative sample in the intended product base. Confirm appearance, aroma, composition, compatibility, stability and packaging suitability under relevant storage conditions.

For buyers and formulators	Batch documentation to request
<ul style="list-style-type: none"> • Confirm intended application and grade. • Review a representative sample. • Assess compatibility and stability. • Set use levels only after a suitable safety review. 	<ul style="list-style-type: none"> • Batch-specific Certificate of Analysis (COA). • Safety Data Sheet (SDS). • Botanical identity and plant part. • Chemotype, extraction method and origin. • Composition and relevant regulatory declarations.

Handling and safety

Essential oils are concentrated materials. Follow the supplier's SDS and applicable regulations. Do not apply undiluted to skin or ingest. Use only in applications supported by the verified grade and a suitable safety assessment. Avoid contact with eyes and keep securely closed and out of reach of children.
