CLOVE LEAF OIL

A clove-derived essential oil for fragrance and formulation development.

BOTANICAL ESSENTIAL OIL • LEAF-DERIVED • AROMATIC INGREDIENT

Product overview

Clove leaf oil is an essential oil distilled from the leaves of the clove tree, *Syzygium aromaticum*. It is commonly characterised by a strong, warm, spicy and clove-like aroma. Its chemical profile can differ from clove bud and stem oils, so the plant part and batch composition should be confirmed from the supplier's specification.

Aroma profile

Typically warm, spicy, rich and distinctly clove-like. Aroma strength and composition vary with leaf source, harvest, distillation and batch quality.

Potential applications

- Fragrance and perfumery blends
- Soap and household product formulation
- Personal-care development, subject to safety assessment
- Ingredient research and development

Formulation considerations

Clove leaf oil may contain a high proportion of eugenol. Assess the actual batch for composition, sensitisation risk, compatibility and applicable use restrictions before selecting a concentration or finished-product application.

Identity to verify

Confirm *Syzygium aromaticum* leaf as the source, the distillation method, chemical profile and whether the material is leaf, bud or stem oil. Do not treat these oils as interchangeable.

FOR INGREDIENT BUYERS & FORMULATORS

Quality checks, documentation and responsible handling.

Quality and evaluation checklist

Review the supplier's technical documents and evaluate a representative sample in the intended product base. Check aroma, appearance, composition, compatibility, stability and packaging suitability.

For buyers and formulators	Batch documents to request
• Confirm intended application and grade. • Test a representative sample. • Assess compatibility and stability. • Establish use levels only after safety review.	• Batch-specific Certificate of Analysis (COA). • Safety Data Sheet (SDS). • Botanical identity and plant part. • Eugenol / composition profile. • Origin, distillation method and relevant declarations.

Handling and safety

Clove leaf oil is a concentrated essential oil and may cause skin irritation or sensitisation. Follow the supplier's SDS and applicable standards. Do not apply undiluted to skin or ingest. Use only in applications supported by the verified grade and a qualified safety assessment. Avoid eye contact and keep securely closed and out of reach of children.
