CINNAMON OIL

A warm, spicy botanical essential oil for fragrance and formulation development.

BOTANICAL ESSENTIAL OIL • WARM SPICY AROMA • FORMULATION INGREDIENT

Product overview

Cinnamon oil is a volatile botanical oil obtained from cinnamon plant material, commonly associated with *Cinnamomum* species such as *Cinnamomum verum*. Its aroma is typically warm, sweet and spicy. The oil's composition depends strongly on the plant part used—bark, leaf or other material—and on the extraction process. Confirm the exact source part and batch profile before describing or using the supplied product.

Aroma profile

Generally warm, sweet, rich and spicy. Aroma intensity and character vary with species, plant part, origin, processing and batch composition.

Potential applications

- Fragrance and perfumery blends
- Soap and home-fragrance formulation
- Cosmetic and personal-care development, subject to safety review
- Ingredient research and development

Formulation considerations

Cinnamon oils can contain potent aromatic constituents. Bark and leaf oils may have different chemical profiles and safety limits. Review the batch composition and applicable standards before selecting a concentration or finished-product application.

Identity to verify

Confirm botanical species, plant part (bark or leaf), extraction method, origin and chemical profile. Do not treat cinnamon bark oil and cinnamon leaf oil as interchangeable.

FOR INGREDIENT BUYERS & FORMULATORS

Quality checks, batch documentation and responsible handling.

Quality and evaluation checklist

Review supplier documentation and assess a representative sample in the intended product base. Check appearance, aroma, composition, compatibility, stability and packaging suitability.

For buyers and formulators	Batch documents to request
• Confirm intended application and grade. • Confirm whether the oil is bark or leaf derived. • Evaluate a representative sample. • Establish use levels only after safety review.	• Batch-specific Certificate of Analysis (COA). • Safety Data Sheet (SDS). • Botanical identity and plant part. • Composition / chromatographic profile. • Extraction method, origin and relevant declarations.

Handling and safety

Cinnamon essential oil is concentrated and may cause irritation or sensitisation. Follow the supplier's SDS and applicable standards. Do not apply undiluted to skin or ingest. Use only in applications supported by the verified grade and a qualified safety assessment. Avoid eye contact and keep securely closed and out of reach of children.
