

CHIRONJI OIL

A botanical seed oil for personal-care and formulation development.

BOTANICAL SEED OIL • BUCHANANIA LANZAN • CARRIER OIL

Product overview

Chironji oil is a fixed oil associated with the seeds of *Buchanania lanzan*, commonly known as chironji or charoli. The oil's appearance, fatty-acid profile and other properties can vary with seed quality, extraction method and processing. Confirm the botanical identity and batch-specific composition from the supplier's technical documents.

Ingredient profile

A plant-derived carrier oil. Its colour, odour, texture and fatty-acid composition should be described using the actual product specification rather than assumed from the common name.

Potential applications

- Personal-care and cosmetic formulation, subject to grade suitability
- Massage and body-care product development, subject to safety review
- Soap and emulsion formulation trials
- Ingredient research and development

Formulation considerations

Assess oxidation stability, odour, colour, texture and compatibility in the intended base. Check the supplier's recommended storage conditions and applicable limits for the finished product category.

Identity to verify

Confirm *Buchanania lanzan* seed as the source, extraction or pressing method, refining status, carrier or additives (if any), and the batch fatty-acid profile.

FOR INGREDIENT BUYERS & FORMULATORS

Quality checks, batch documentation and responsible handling.

Quality and evaluation checklist

Review the supplier's technical documents and test a representative sample in the intended product base. Evaluate appearance, odour, texture, compatibility, oxidation stability and packaging suitability under relevant storage conditions.

For buyers and formulators	Batch documents to request
<ul style="list-style-type: none"> • Confirm intended application and grade. • Review a representative sample. • Assess compatibility and stability. • Confirm use levels through formulation review. 	<ul style="list-style-type: none"> • Batch-specific Certificate of Analysis (COA). • Safety Data Sheet (SDS), where applicable. • Botanical identity and seed source. • Extraction method and refining status. • Fatty-acid profile and relevant quality tests.

Storage and handling

Follow the supplier's storage instructions. Protect the oil from excessive heat, light and air exposure where relevant to maintain quality. Use only in applications supported by the verified grade and technical documentation. For cosmetic use, assess finished-formula safety and suitability.
