CAJEPUT OIL

A fresh, camphoraceous botanical essential oil for fragrance and formulation development.

BOTANICAL ESSENTIAL OIL • FRESH AROMATIC PROFILE • FORMULATION INGREDIENT

Product overview

Cajeput oil is an essential oil generally distilled from the leaves and terminal twigs of *Melaleuca cajuputi* and related cajeput-type trees. It is commonly described as fresh, herbaceous and camphoraceous. Its exact chemical profile and aroma vary with botanical identity, origin, harvest and distillation. Confirm the species and batch composition against the supplier's technical specification.

Aroma profile

Typically fresh, penetrating, green, herbaceous and camphoraceous. The exact scent profile can vary between source regions and batches.

Potential application areas

- Fragrance and perfumery blends
- Soap and home-fragrance formulation
- Personal-care product development, subject to safety review
- Aromatic ingredient research and development

Formulation considerations

Review the actual batch composition and assess compatibility, stability and sensory impact in the intended product base. Determine use levels only through applicable standards and a qualified safety assessment.

Botanical identity to verify

Confirm the botanical species, plant parts used, distillation method, origin and batch chromatographic profile. Do not assume every product sold as cajeput oil has an identical composition.

FOR INGREDIENT BUYERS & FORMULATORS

Quality checks, batch documentation and responsible handling.

Quality and evaluation checklist

Review the supplier's technical documents and evaluate a representative sample in the intended product base. Check appearance, aroma, composition, compatibility, stability and packaging suitability.

For buyers and formulators	Batch documents to request
• Confirm intended application and grade. • Review a representative sample. • Assess compatibility and stability. • Establish use levels only after safety review.	• Batch-specific Certificate of Analysis (COA). • Safety Data Sheet (SDS). • Botanical identity and plant part. • Composition / chromatographic profile. • Extraction method, origin and relevant declarations.

Handling and safety

Cajeput oil is a concentrated essential oil. Follow the supplier's SDS and applicable standards. Do not apply undiluted to skin or ingest. Use only in applications supported by the verified grade and a qualified safety assessment. Avoid eye contact and keep securely closed and out of reach of children.
