# BALSAM TOLU OIL

A warm, balsamic aromatic ingredient for fragrance and formulation development.

**BALSAMIC AROMA • RESINOUS BOTANICAL MATERIAL • FRAGRANCE INGREDIENT**

## Product overview

Tolu balsam is a fragrant resinous exudate obtained from *Myroxylon balsamum* (often referred to botanically as *Myroxylon balsamum* var. *balsamum*). Materials sold as “Balsam Tolu Oil” may refer to a distilled fraction, an extract, a resinoid, or a prepared dilution. These forms have different compositions and handling properties. Confirm the exact product type and batch specification before using this description on a technical or commercial label.

## Aromatic character

Tolu balsam materials are commonly associated with a warm, sweet, rich, vanillic, cinnamon-like and balsamic scent. The exact profile depends on the processing method and composition of the supplied material.

## Potential application areas

- Fine fragrance and perfumery accords
- Incense and aromatic product development
- Soap and personal-care formulation, where permitted
- Fragrance research and product development

## Formulation considerations

Check physical form, solubility, colour, odour, compatibility and stability in the intended base. Confirm applicable fragrance standards and restrictions for the intended product category and sales market.

## Identity to verify

Confirm botanical source, whether the material is balsam, essential oil, extract, resinoid or dilution, the extraction or processing method, solvent or carrier (if any), and the batch composition.

# FOR FRAGRANCE & INGREDIENT BUYERS

Product evaluation, batch documentation and responsible handling.

## Quality and evaluation checklist

Review the supplier's technical documents and evaluate a representative sample in the intended product base. Check appearance, aroma, solubility, compatibility, stability and packaging suitability under relevant storage conditions.

| For buyers and formulators | Batch documents to request |
|---|---|
| • Confirm the exact material type and grade.<br>• Review a representative sample.<br>• Assess compatibility and stability.<br>• Confirm permitted use levels for the target application. | • Batch-specific Certificate of Analysis (COA).<br>• Safety Data Sheet (SDS).<br>• Botanical identity and source material.<br>• Processing method, solvent and carrier details.<br>• Composition and relevant allergen / regulatory declarations. |

## Handling and safety

Follow the supplier's SDS and applicable fragrance or cosmetic regulations. Resinous aromatic materials may cause irritation or sensitisation in some users. Do not apply undiluted to skin or ingest. Use only after confirming the exact composition and completing a suitable safety assessment. Avoid eye contact and keep securely closed and out of reach of children.
