NUTRACEUTICAL PRODUCT EXTRACTS

Botanical ingredients and plant-derived extracts for product developers, brands and ingredient buyers.

Botanical extract range
Nutraceutical extracts are plant-derived ingredients supplied in different forms, including powders, liquids and standardised extracts. Their identity and composition depend on the source plant, plant part, extraction method and batch specification.

Illustrative product categories

Herbal extracts Botanical extracts such as Ashwagandha, Amla and Aloe Vera.	**Polyphenol extracts** Examples include Green Tea catechins and Grape Seed polyphenols.
Root and rhizome extracts Examples include Turmeric and selected Ginseng materials.	**Resin-derived extracts** Examples include Boswellia-derived ingredients.
Seed and fruit extracts Botanical ingredients such as Shilajit is not in this category; verify source-specific classification.	**Specialty botanical extracts** Ginkgo Biloba and other extracts with defined identity and specifications.

BUYER & FORMULATOR INFORMATION

Specification, quality documentation and responsible product communication.

What to verify before purchase

Check	What to confirm
Botanical identity	Scientific name, plant part, source and identity/authentication method.
Extract format	Powder, liquid, dry extract, tincture, isolated compound or other supplied form.
Extraction process	Solvent, extraction ratio (DER), carriers/excipients and processing details.
Standardisation	Marker compound, stated assay percentage and validated test method, if applicable.
Quality testing	Batch COA, microbiology, heavy metals, pesticides, residual solvents and relevant contaminants.
Regulatory suitability	Intended use, permitted ingredients, limits, labelling and destination-market requirements.

Applications and claims

Potential uses may include dietary supplement, functional food, beverage, cosmetic, personal-care or research applications only where the specific ingredient grade and applicable regulations permit. Do not infer health benefits, efficacy, organic status or standardisation from an ingredient name or illustrative image. Claims require product-specific evidence and regulatory review.

Enquiry checklist

When requesting a quotation, specify the extract name, scientific name, plant part, required form, marker/assay, quantity, intended application, destination market and documentation requirements.
