HERBAL POWDERS

Plant-based powder ingredients for product developers, brands and ingredient buyers.

Explore the herbal powder range
Herbal powders are prepared from selected plant parts such as roots, leaves, fruits, seeds and flowers. Their identity, appearance and suitability depend on the botanical source, plant part, processing method, mesh size and batch specification.

Illustrative product categories

Turmeric Powder Rhizome-derived powder; verify curcuminoid content if a marker specification is required.	**Ashwagandha Powder** Root or other specified plant-part powder; confirm botanical identity and plant part.
Amla Powder Fruit-derived powder; check moisture, colour and relevant quality parameters.	**Neem Powder** Leaf or other specified plant-part powder; confirm intended application and grade.
Moringa Powder Often leaf-derived; confirm species, plant part and processing details.	**Brahmi Powder** Confirm whether the source is Bacopa monnieri or another plant sold under a Brahmi common name.
Shikakai Powder Pod-derived botanical powder commonly used in suitable hair-care formulations.	**Reetha Powder** Fruit-derived powder; confirm species and saponin-related specification if relevant.
Hibiscus Powder Flower-derived powder; confirm species, plant part and intended application.	**Other herbal powders** Availability and specifications can be discussed for additional botanicals.

BUYER & FORMULATOR INFORMATION

Quality checks, specifications and responsible product communication.

What to verify before purchase

Check	What to confirm
Botanical identity	Scientific name, plant part, source and identity/authentication method.
Processing & form	Raw or processed powder, drying method, milling process and any carriers or additives.
Physical specification	Mesh size, moisture, appearance, colour, odour and bulk density where relevant.
Active markers	Marker compound or assay requirement, test method and stated value if standardised.
Quality testing	Batch COA and relevant microbiological, heavy-metal, pesticide, aflatoxin and contaminant tests.
Regulatory suitability	Intended application, permitted use, labelling and destination-market requirements.

Applications and claims

Depending on the specific grade and applicable regulations, herbal powders may be evaluated for food, supplement, cosmetic, personal-care, hair-care or other suitable applications. Do not infer health benefits, efficacy, organic status or standardisation from an ingredient name or illustrative image. Substantiate product claims and review regulatory requirements before marketing.

Enquiry checklist

For a quotation, share the product name, scientific name, plant part, required grade, mesh size, quantity, intended application, destination market and documentation requirements.
