Contact Sihauli Chemicals for current availability, grade details and commercial enquiries.

FORMULATION & PROCUREMENT

DIAZOLIDINYL UREA

POTENTIAL FORMULATION AREA

Diazolidinyl Urea is used as a preservative in certain personal-care and cosmetic products. The supplied reference image does not specify a particular formulation, concentration, use level or performance profile. Confirm that the selected grade is suitable for the intended product and destination market.

Information to confirm	Recommended documentation
Chemical identity / CAS number	Current TDS and SDS
Assay / purity and impurities	Batch-specific CoA
Appearance and physical properties	Current product specification
Recommended use level and compatibility	Supplier guidance and formulation testing
Packaging, storage and shelf life	Supplier label and current TDS
Safe handling and exposure controls	Current SDS

REGULATORY & SAFETY CHECK

Preservative permissions, maximum concentrations, labeling and ingredient restrictions can differ by product type and destination market. Before formulation or making compliance claims, verify the applicable cosmetic regulations, permitted use conditions, ingredient labeling requirements and current Safety Data Sheet (SDS). This brochure is marketing information only and is not a substitute for technical, safety or regulatory documentation.
