BHA (BUTYLATED HYDROXYANISOLE)

ANTIOXIDANT | PRODUCT BROCHURE | SIHAULI CHEMICALS

PRODUCT OVERVIEW

Butylated Hydroxyanisole (BHA) is an antioxidant used to help slow oxidative deterioration in suitable products. It may help protect oxidation-sensitive ingredients and support formulation stability. The supplied reference image identifies the product as BHA and shows a blue drum labelled 25 kg. Confirm the actual grade, packaging and net weight for the offered lot with the supplier.

Product name	Butylated Hydroxyanisole
Abbreviation	BHA
Product category	Antioxidant
Packaging shown	Blue drum; reference label indicates 25 kg (confirm per lot)
Email	sales@sihaulichemicals.com
Website	www.sihaulichemicals.com
Phone	+91 9579137783

Contact Sihauli Chemicals for availability, grade details and commercial enquiries.

APPLICATIONS & PROCUREMENT

BHA | BUTYLATED HYDROXYANISOLE

FORMULATION CONSIDERATIONS

BHA is used as an antioxidant in selected applications. The supplied reference image does not specify an intended application, grade, concentration or use level. Confirm suitability for the finished product, formulation compatibility and applicable ingredient permissions before use.

Information to confirm	Documentation / check
Chemical identity and CAS number	Current Technical Data Sheet (TDS) and Safety Data Sheet (SDS)
Assay / purity and impurities	Batch-specific Certificate of Analysis (CoA)
Appearance and physical properties	Current product specification
Recommended use level and compatibility	Supplier guidance and formulation testing
Packaging, storage and shelf life	Supplier label and current TDS

REGULATORY & SAFETY CHECK

BHA use conditions, permitted concentrations and labeling requirements can vary by product type and destination market. Verify the applicable regulations and current safety documentation before commercial formulation or making compliance claims. This brochure is marketing information only and is not a substitute for a TDS, SDS, CoA or regulatory advice.
